April 5, 2008

Notice to all EcliptixNet Customers,

If you are a subscriber who has chosen an email address through EcliptixNet (i.e. ...@ecliptixnet.com or ...@ecliptx.net), please visit our website at [www.ecliptixnet.com](http://www.ecliptixnet.com) and click "Email Login" under Current Customers to login to your email account.

If you use an email client on your computer to manage your email (i.e. Outlook Express, Outlook, Thunderbird, etc.), our email server configurations have changed recently and need to be updated on your client program.

These configuration changes are as follows:

\*\*\*\*\*

POP3 (Incoming) Server: [pop.secureserver.net](http://pop.secureserver.net)  
SMTP (Outgoing) Server: [smtpout.secureserver.net](http://smtpout.secureserver.net)

POP3 Port #: **110**  
SMTP Port #: **25**

\* **Do not select** "Require logon using Secure Password Authentication (SPA)"

\*\***Select** "My outgoing server (SMTP) requires authentication" **And** "Use same settings as my incoming mail server."

\*\*\*\*\*

If these changes are not made on your email client program, you may be able to send email, but you will not receive any. This may be the reason why you have not received an email invoice from us. Please contact our Support Team at [support@ecliptixnet.com](mailto:support@ecliptixnet.com) if you have any questions regarding these email server configurations.

Sincerely,

*Your Support Team*
